Re: Testimonial

Dear Steve,

I just wanted to thank you, Mark and the entire team for your fine work on the build out of our new offices by providing you with this testimonial to share with future potential MyGreenBuildings commercial clients.

Your professional team at MyGreenBuildings recently completed an office build-out for my business, Comprehensive MedPsych Systems, Inc. on the 2nd Floor at 1250 Medical Plaza here in Sarasota. The project included a 5,500 square foot space completed in less than 3 months from raw shell to our occupancy. This included 27 individual offices, conference room, reception, restrooms, staff kitchen, admin space and filing storage. Not only was the 3 month project completed on time, but also on budget.

With your precise timeline, we were literally able to plan for our move in advance, and shut down operations in our old space on Friday after business, and open up for clients on Monday morning, without missing a single appointment.

You have assembled a team of consummate professionals, and I would highly recommend your business to anyone that wants to work with a contractor committed to client service, quality, organization, and making the process easy.

All my best,

Geoffrey Kanter, Ph.D.
